

An EHR Data Hostage No More!

How Migrating Your EHR Data Just Became Easier

If you've put up with your EHR system simply because you weren't prepared to pay exorbitant fees for your patient data or leave it behind, we have great news for you!

The latest requirements of the 21st Century Cures Act require that your EHR vendor must now provide you with the ability to export your patient data from your current system at no cost, and easily migrate data to your new EHR system. Here's what you need to know:

Data Export Capabilities Your EHR Vendor Must Provide

- An easy, secure way for you to export your patient data. This includes patient personal health information (PHI) and all exam data required for medical decision making.
- Export of your patient data in a readable electronic format that can be easily converted by your new EHR vendor.
- Straightforward tools that allow YOU to extract your data without relying on vendors assistance.
- Exporting of data with no fees. There are [exceptions](#) when vendors may charge you a fee, but they are limited and don't generally apply to the options described above.

Failure of an EHR Vendor to comply with the data export requirements of Cures is considered [Information Blocking](#). If your EHR vendor engages in Information Blocking, they risk losing their ONC Health IT certification and can be fined up to \$1M per incident. To report complaints about information blocking, please visit the [ONC Information Blocking Portal](#) or the [OIG Hotline](#).

How Compulink Can Help

At Compulink, we have always believed that your data is YOUR DATA. Compulink is ONC 2015 Cures Update Certified and in full compliance with the enhanced interoperability, and transparent data access provisions. We offer:

- **Interoperability Excellence:** Our EHR system stands out with its robust interoperability capabilities. We employ HL7 and FHIR standards, enabling our system to communicate, exchange, and interpret shared data with other EHR systems seamlessly.
- **Streamlined Data Export Capabilities:** We provide a straightforward, secure data export function, allowing healthcare providers to efficiently transfer electronic health information (EHI), reducing administrative burdens and fulfilling regulatory requirements for data accessibility.
- **Data Migration Services:** Transitioning to Compulink from your previous vendor has never been easier! We offer a full range of data conversion services, along with extraction assistance from your current vendor.

Ready to Break Free of Your Current Vendor?

Compulink's Advantage SMART Practice® all-in-one EHR and practice management solution has empowered specialty medical practices and surgical centers to reduce costs, increase efficiency, and simplify the delivery of high-quality patient care. Powered by intelligent workflow automation technology and fully workflow customizable, Compulink is used by more than 26,000 providers in 4700 locations, 70 ASC, and 20 colleges and universities. Compulink offers comprehensive EHR solutions for dermatology, behavioral health, gastroenterology, ophthalmology, optometry, orthopaedics, otolaryngology, pain management, physical therapy, podiatry, urology, and ambulatory surgical centers.
