

Go Cloud With Us

If you are still hosting your Advantage software on your own server, you could be missing out on benefits only available with our Advantage Cloud service.

[Learn more](#) >

With our Cloud service, you'll pay less for support including:

- 17% less on annual support
- No API fees
- No VPN fees for partner product connections

Savings on FHIR API Fees

Our HIPAA compliant Cloud uses the latest in cybersecurity technology to help protect you against malicious threats including ransomware.

We handle all updates to your Advantage software including mid-version enhancements as they become available. We also ensure your data is continually backed up.

Our Cloud offers 99.98% uptime for optimal reliability and accessibility. Can your server match that?

We support your ENTIRE Advantage implementation, both software and hardware. This allows us to isolate and resolve issues more quickly.

Our Cloud service includes daily data mining of your error log, to proactively identify and prevent errors from occurring.

You only pay for the users you add. This ensures cost-effective growth and incremental scalability as your needs evolve.

“Our decision to transition our 32 locations, ASC, 31 providers, and 275 users across 2 states to Compulink’s Cloud has been a pivotal choice that has yielded remarkable benefits for our organization. We’ve experienced a significant boost in software responsiveness, reduced headaches for our IT department, and an increased ability to adapt to our changing requirements.”

— Ryan Decker
Chief Operating Officer
Marion Eye Center
